

DigiSelect

What our clients are saying about DigiSelect:

"Best show management system I've ever used. The wireless remote makes it easy to recall my music and light settings at a moment's notice"

Robert Berry - Professional stage Magician & Hypnotist

I used DigiSelect in my first show last night and it worked like a dream! It's easy-to-use and brilliantly effective! I love it!

Show Management System

Why DigiSelect?

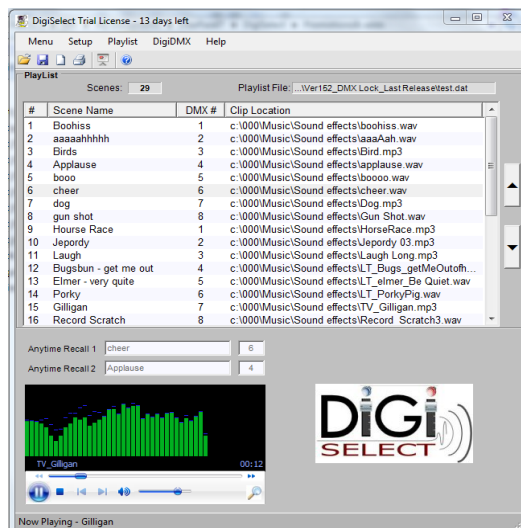

DigiSelect enables you to create Playlist that control your digital audio clips, video, DMX light and effects and recall them on-demand.

DigiSelect provides a large on screen display to see queued and playing scenes from across the stage.

DigiSelect gives you the ability to create as many Playlists as desired for instant playback when required.

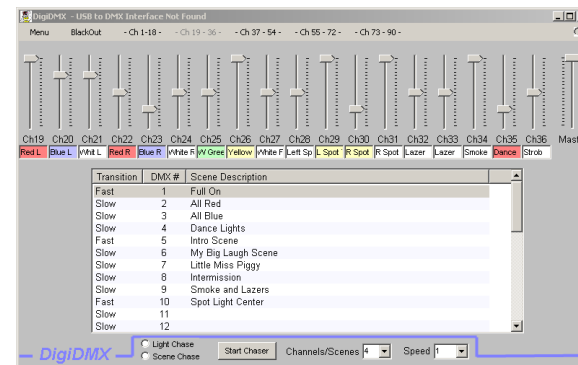

DigiSelect controls your DMX stage lighting & effects using a 90-channel fader with 30 Scene memory capabilities and fast & slow transitions.

DigiSelect runs on your own PC and offers full control using a small PC Media Remote. (Not included)
